## POLYTALON CLOSED LOOP —

The biggest advantages of PU are certainly its weight, freedom of design, safety and sustainability. The biggest disadvantage of PU compared to PE is certainly the lower abrasion resistance and the slightly higher price. - We are aware of this. But now we are proud to offer the solution to this problem: The Polytalon Closed Loop. With our in-house coating system, we give worn holds a second life. In this way, we combine the advantages of PU with the durability of PE. And the longer the product life cycle, the lower the price.
